

Week 1:

I worked on understanding StarCraft II and in this regard. I start watching videos and downloaded the game and watch videos on how to play the game and start playing game over weekend.

Week 2:

Along with Playing the game, I also start working on creating a bot by using tutorials and github from other people.

Week 3:

After spending time with my team, we start working on strategy about bot creation and played game to understand more about the game.

Week 4:

Spend time on making features we want to come up on AI and Q-learning. And spend time on understanding deep learning.

Week 5:

Duncan and Adam Created replays and along with Mohan came up with strategy for Analysis.

Week 6:

Worked on Strategy about statistical analysis with Mohan.

Week 7:

Decided to focus on Statistical analysis and came up with variables we have to focus from replay analysis to make the bot better.

Week 8:

Mohan and I start working on Group Website and also keep working on statistical analysis by analyzing replays in order to make the bot better.

Week 9:

Finished website and Statistical Analysis.

Week 10:

Talk to TA and changed the website to make it more functional from information perspective.
